Ever wanted to speak with someone or get support for living well with bodies that are a bit different?

interLink is a six-session program for people aged 10+ with intersex variations and parents or carers, where you can speak with a trained mental health practitioner, get connected to peer support and meet others like you - all in the one place.

Groups run online and in-person throughout the year. To find out more, scan the QR code and get linked up.

Check for upcoming sessions or register your interest at www.ilink.net.au
